SUBJECT INDEX TO VOLUME 25

A

Absorption, 849
Adrenalectomy, rat, 127, 139
Aging, 533
Albumin, serum, 561
Alfalfa, 799
Alga, 417, 543
Alimentary, fiber, 859
Amaranth, toxicity, 169
Amino acid(s), (see also specific amino acid)
  branched chain, 809
  concentration, 1
  content, 567, 913
  levels, 153
  plasma, 213, 399
  supplementation, 235, 259, 491, 709
  toxicity, 139
Anemia, in elderly, 97
Anna Pavala Sindhooram, 649
Anthropometry, 353
Arthrospira platensis, 543
Ascorbic acid, 463
  intake, 941
  tissue concentration, 553
Atherosclerosis, 83, 345

B

Baboon, 251
Barley, 89
  bran, 1
Bile acids, 251
  metabolism, 941
Biological value, 897
Blindness, 431
Blood, donor, riboflavin nutriture, 485
Body composition,
  broilers, 601
  rat, effect of Ragi husk, 205
Bone, development, 7
Breadfruit, 643
Breakfast cereals, 245
Broiler,
  chicken performance, 591
  male, 601

C

Cadmium, 311
Calcium, 311, 583
  deficiency, 7
Capsules, gelatin, 639
Carbohydrates, 161
  dietary, 921
Carcass, composition, rat, 127
Carnitine, 201
Carotene, 687
Casein, 725
Cassava, 541
Cellulose, dietary, 709
Cell-mediated immunity, mice, 443
Celosia argentea, 887
Central nervous system, 285
Cerium, 333
Chemical composition,
  locust bean, 867
  cowpea, 913
Chicks, 799
Children, nutritional status, 353 363, 373
Cholesterol, 629, 725, 921
  dietary, 251, 345, 879
  levels, 687
Choline, 235
  deficiency, 773
Chromium, 49
Circadian rhythm, 789
Clinoptilolite, 837
Cockerels, 133
Coffee, 133
Collagen, 153
Conjugation, estradiol-17β, in rats, 525
Contraceptives, 687
Copper,
  dietary, 277

supplementation, 591
Cortisol, 339
Cotton seed, 629
Cowpea, 913
Cows, 293, 471
Culture and nutrition, 189
Cyanide,
lethality, 463
metabolism, 451
2',3'-Cyclic nucleotide 3'-phosphohydrolase, 285
Cystathionine, 269
Cystine, 235
Cytosol, 499

D

Dehydroascorbic acid, 463
Diabetes,
mice, 443
rats, 15
Diet,
atherogenic, 75
N-free, 213
protein-free, 317
Dietary,
ascorbic acid, 941
fat, 31
fiber, 23, 169, 621, 783, 799
lipids, 753
protein, 601, 709
Digestibility,
alga, 417
coeeficient, 629

E

Electron microscopy, 33, 381, 409
Elderly,
anemia 97
nutritional status, 189
obesity, 533
Endogenous energy, 613
Energy,
levels, 601
metabolizable, 829
Enzyme, 145, 235, 259, 285
(see also specific enzyme)
glutathione, 573
_____, reductase, 485
glyceraldehyde-3-phosphate dehydrogenase, 507
microsomal, 753
Energy, excretion, 133
Erythrocyte glutathione reductase, 485
Estradiol, 269
-17β, 525

F

Fasting, effect on gut clearance, 613
Fat, dietary, 31
Fatty acids, odd chain, 753
____ liver, 799
Fecal weight, 23
Feed, 333, 381, 409
efficiency, 783
restriction, 907
Feeding, schedule, 789
Fertilizer, nitrogen, 89
Fiber, dietary, 23, 169, 621, 783, 799, 859
Fish, protein concentrate, 567
Food, efficiency, 31
Force-feeding, 799
Fructose, 675

G

Gastrointestinal, transit time, 23
Gelatin, capsules, 639
Genital, maturity, male rats, 733
Glutathione, 573
reductase, 485
Goats, 879
Groundnut oil, 629
Growth,
ducks, 907
rats, 71
rate, fractional, rats, 301
___, mice, 113
_____ and body composition, 205

Guinea pig, 201, 553, 725, 941

H

Heat, effect in inactivating
trypsin inhibitors, 743
Hens, laying, 213
Hormone, 317, 819
Hypercholesterolemia, endogenous,
83

I

Infant, feeding, 567
Iodobenzene, 649
Iron,
absorption, 849
supplementation, 591

J

Jejunal, transit time, 169

K

Kidney, morphology, 553

L

Lactation, rats, 71
Lanthanum, 381
Leaf, protein, 887
Legumes, 743
Linoleic-1-$^{14}$C acid, 661
Lipids, 697, 773
dietary, 753
liver, 921
metabolism, 251
peroxidation, 931
plasma, 789
serum, 675
Lipid-protein concentrate, 867
Lipogenesis, 675
Lipoprotein, 75, 161, 725
composition, 879
density, high and low, 697
Liver,
fatty, 799
lipid, 921
Locust-bean, West African, 867
Lupines, 763
diets, 259
Lysine, supplementation, 491, 709

M

Macaques, 75
Magnesium, 293, 583
Malnutrition,
rats, 661
sheep, 339
Manganese, 849
supplementation, 591
Mango kernal, 697
Markers, inert, 333, 381, 409
Maturity, male rate, genital, 733
Melatonin, 733
Melon seed, 643
Metabolizable energy, 639, 829
Methionine, 235
levels, 153
supplementation, 491
toxicity, 139
Milk,
blends, nutritive quality, 519
cows, fortified, 849
_____, production, 471
Mineral, (see also specific mineral)
bioavailability, 583
metabolism 591
Monensin, 399
Monkeys, Rhesus, 507
Muscle, children, 57

N

Niacin, availability, 389
Nitrogen,
absorption, 113, 829
balance, 809
excretion, 133
fertilizer, 89
Nitrogen-free diet, 213
Nutrient utilization, pigs, 451

Nutrition,
knowledge, children, 363
mineral, 49
sheep, fetal, 339
total parenteral, 309
Nutritional,
composition, 643
quality, milk 519
status,
children, 57, 353, 363, 373
elderly, 189
value,
alga, 417
leaf protein, 887
locust-bean, 867
niacin analogs, 389

O

Obesity, elderly, 533
Organophosphate, insecticidal, 71

P

Pacific whiting, 639
Palmitic-1-$^{14}$C acid, 661
Pantothenate, 245
Pekin duck, 907
Peroxidation, lipid, 931
Phosphorus, 221, 583
Phytate, 221
Phytic acid 621
Pigs, 451, 543
growing, 1
weanling, 561
Plant foods, nutritive qualities, 643
Plasma,
free amino acid, levels, pigs, 1
lipids, 789
liporoteins, 75, 161
Polychlorinated biphenyls, 931
Primates, non-human, 75
Progesterone, serum, 317
Protein,
alga, 543
analysis, 859
binding, 107
composition, 9
deficiency, 7
dietary, 601
leaf, 887
level, 399
malnutrition, 317, 819
quality, 567, 763, 897
rapeseed, 621
status, 561
soluble, 471
supplementation, 451
synthesis, 301
utilization, 709
rabbits, 491
Protein-calorie malnutrition, 7, 525
Protein-free diet, 317
Protein efficiency ratio, 259, 519, 629, 763, 867, 897
Pyrophosphatase phosphohydrolase, 145

Q

Quail, Japanese, 345

R

Rabbits, fryer, 491
Radioisotopes, 849
Ragi husk, 205
Rapeseed, 621
Rare earth, 333, 381, 409
Red blood cells, Rhesus monkey, 507
Renal, function, cows, 293
Riboflavin, status in blood donors, 485
RNA polymerases, 259
Roosters, 613
Rumen, by-pass, 471

S

Samarium, 381
Satiety, 783
Scurvy, guinea pigs, 201
Serine, 235
Serum,

lipids, 675
urea concentration, 897
Sheep, 277, 339
Sibling, effect on nutritional status, 373
Skinfold thickness, children, 57
Sludge, activated, 829
Socio-economic influence on nutrition, 373
Sodium nitrate, 293
Soy protein, 725
Spirulina maxima, 543
Starvation, 145
Starvation-refeeding, periodic, in rats, 127
Stature, Egyptian children, 57
Steers, 399
Streptozotocin, 443
Succinic dehydrogenase, 145
Sucrose, 31, 161, 773
Swine, 837

T

Tallow, 879
Taurine, 269
Tea, 133
Teeth, rat molar, 311
Thailand, nutritional status preschool children, 353, 363, 373
Thermogenesis, 819
Thiamine, deficiency, 285
Thiols, 743
Threonine, supplementation, 709
Thyroid, 819
therapy, 649
Tocopherol, 507, 733
alpha, 107
____, supplementation, 931
transport, in chicks, 499
Tofu, 519
Toxicity,
amaranth, 169
methionine, 139
Transferrin, serum, 561
Transit time, intestinal, 23, 169
Trout, 49
Trypsin, inhibitors, 113, 743

U

Urea, serum concentration, 897

V

Vigna unguiculata, 913
Vitamin(s), (see also specific vitamin)
A, 139, 687
deficiency, 7, 431
low dietary concentration, 15
$B_6$, 269
C, 201
supplementation, 553
E, 83, 107
deficiency, 507

W

Weaning, children, 373
Wheat bran, 583

Y

Yeast, 221
n-alkane grown, 753

Z

Zeolite, 837
Zinc, 499, 583
deficiency, 573
dietary, 277
supplementation, 591
